

Aerial Seeding of Cover Crops

BENEFITS OF AERIAL APPLIED COVER CROPS

- Seed into Standing Corn, Soybeans, Wet, or Dry Ground
- Erosion Control
- Limit Nitrogen Leaching
- Suppress Weeds
- Grazing Potential
- Wildlife Habitat
- Increase Soil Organic Matter
- Reduce Soil Compaction
- Able to Cover Many Acres in Limited Time Window

EQUIPMENT USED

- Two 402B AirTractors, a 502B AirTractor, and a Cessna 188
- One Custom Auger Truck (loads planes in under 2 minutes)

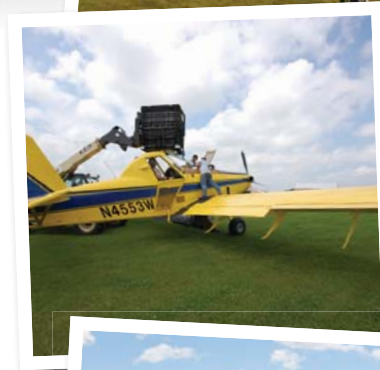

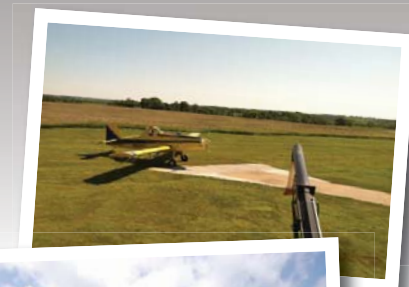

Seeding Rates from #10-#100 or more per acre.

Application costs vary depending on seeding rates and proximity of loading site.

P.O. Box 291 | Indianola, Iowa 50125 | Office: 515-961-4026

Agri-Tech Aviation, Inc., owned by me, Terry Sharp and my wife Debbie, and its predecessor Laverty Sprayers, has been serving Iowa agriculture since 1947, when my father Weston teamed up with Chuck Laverty to provide crop protection to Wallace Farms. Today, along with our sons Weston and Jerad, we continue our reputation of quality service to seed producers, ag retailers, and growers by protecting and enhancing their efforts to feed and fuel the world.
